The Engineering Division is responsible for the primary areas of the following:

- Interacting with the public to serve a wide array of needs, concerns, information dissemination, and communication;
- Working with the construction industry to provide appropriate permits, project inspections, and information and knowledge needs;
- Record-keeping;
- Mapping (a vital part of the record-keeping mission);
- Traffic improvements for vehicles and pedestrians;
- Street addressing;
- Federal, State, and local code compliance;
- Working with franchise utility companies;
- Design and/or monitoring of public and certain private construction activities; and

- Improving the quality, efficiency, and timeliness of meeting public needs.

The Engineering staff interacts closely with other City Divisions and Departments to supply a range of products and services including mapping, drafting, engineering, and surveying services.

Your comments, questions, and suggestions are always welcome. Please e-mail us.
